Formulario PHP-SQL

1 Connessione al DB (OO)

```
1 $con = new mysqli("localhost","name-of-user","password-of-user","db-name");
2 if($con->connect_errno){
3     die("Connection failed: " . $con->connect_error);
4 }
```

2 Esecuzione query (OO)

```
$\text{fres} = \text{scon->query(\text{\text{query}});}
if(!\text{\text{res}){}
die("\text{\text{Query failed: ". \text{\text{scon->error}};}
}
```

3 Ottenere il risultato (OO)

4 Chiudere la connessione

```
1 $con->close();
```

5 SQL Injection

6 Transazioni (cenni)

```
$\text{scon->begin_transaction();}
try {
    // query
    $\text{scon->commit();}
} catch(Exception $e) {
    $\text{scon->rollback();}
    throw $e;
}
```
